

Western Cape Provincial Government - Integrated Fare Management (IFM) and Intelligent Transport System (ITS)

- Saha was commissioned by the Western Cape Provincial Government in 2006 to source, design and implement an IFM and ITS system.
- Investigated the user requirements for a new IFM and ITS System based on Contactless smartcard technology in accordance with the National strategy.
- Wide-ranging project. Included Real Time Passenger Information, Incident Management, Traffic Light prioritization, headway management etc.
- Our role included the development of a business case, a detailed business plan and the fare rules. The business plan included organizational design and the operational methodology.
- Western Cape residents will soon be able to use smartcard technology to simplify their public transport journey on rail, bus and taxi.
